1 Getting Started

Ashen Crown is a top-down pixel-art action RPG. You roll a fate, take up arms in a fallen empire, and grind your way from a Rusted blade to Mythic gear across seven biomes, a buried underworld and dozens of dungeons. Fights are fast and spammy: hold to attack, chain abilities, build kill streaks, and watch the loot rain.

The title screen. “The dice remember a crown that the world forgot.”

Your first hour

- **Roll the fates.** New Game rolls a race and a class with the dice (you can reroll or pick). A few race and class pairs unlock a hidden *Rare Fate* with its own quest line (see Classes).
- **Start in your home town.** Each race begins in its own settlement with a race quest from the local elder. Follow the gold marker; the distance shows on the edge of the screen.
- **Learn the loop.** Hold left click to attack, press Q/E/R for your weapon’s abilities, X for your class signature, Space to dodge. Kill packs fast to build a streak and earn bonus XP.
- **Swap weapons.** Keys 1–4 swap between four weapon slots. Each weapon brings its own Q/E/R kit, and a spellbook in hand gives its spells.
- **Gear up.** Loot drops constantly; rare and better items shoot up a coloured beam. Open the Inventory (I) — a green arrow marks an upgrade. Sell junk at merchants, upgrade at blacksmiths.
- **Travel.** Touch waystones to attune them, then open the Map (M) and click any town, waystone or discovered dungeon to fast travel — even from inside a dungeon, as long as you are not mid-fight.

The HUD

The HUD: health and mana orbs, weapon slots 1–4, Q/E/R abilities, X signature with its resource meter, Z/V potions, stamina and XP, minimap and quest tracker.

- **Health orb (red)** and **mana orb (blue)** sit at either end of the bar. Stamina is the thin bar above it; sprinting and dodging spend it.
- **Weapon slots 1–4** show what you carry; the one in hand is lit. Swapping plays a quick twirl.
- **Q / E / R** show the abilities of the weapon in hand, with a cooldown sweep, a flash when ready, and a tint when you lack mana or stamina.
- **X** is your class signature with its resource meter. **Z / V** are potions with their counts.
- Top right: minimap, region and danger level, time of day and weather, gold, and your tracked quest. The kill-streak counter pops in from 3 kills.

2 Combat

Combat is built to be fast and spammy. There are no charge attacks: hold the button and your character keeps swinging, shooting or casting for as long as you hold it.

Attacking

- **Hold to attack.** Melee swings chain into each other as soon as the previous hit lands. Every weapon has a combo (usually 3 swings); the **last swing is a finisher** that hits 35% harder, has a wider arc, knocks back further, and on two-handed or overhead swings sends out a shockwave.
- **Swing step & soft lock.** Each swing steps you toward the closest enemy near your aim (up to ~2.4 m with one-handers, ~1.7 m with two-handers) and turns you to face it, so held chains keep connecting.
- **Bows** draw to full and loose on their own while you hold; letting go early looses a quicker, weaker arrow. **Crossbows** fire and auto-reload. **Staffs, wands and spellbooks** throw elemental bolts.
- **Backstabs** deal +20%. Hits from stealth deal ×2.5. **Critical hits** add your crit damage bonus and freeze the frame a little longer.
- **Block** with right click (shields block far more). Tap block just before a hit lands to **parry**. **Dodge** (Space) rolls you through attacks and can cancel the end of a swing.

Abilities & cooldowns

Q, E and R are the abilities of the weapon in your hand (see Weapons & Loadout). Physical techniques cost stamina, spells cost mana. Holding an ability key recasts it the moment it comes off cooldown. Cooldowns and costs are tuned short — expect to be pressing buttons constantly.

Status effects

Effect	What it does
Burn	Fire damage over time (≈22% of the hit per second) for a few seconds.
Chill	Slows movement by 35%. Three chill stacks **freeze** the target solid.
Freeze	Target cannot act. Shatters with a burst of ice when it ends.
Shock	Target takes +10% damage from non-lightning sources.
Soak	Wet: lightning hits deal +40%.
Poison / Bleed	Damage over time. Bleed is applied by crits with certain powers.
Weaken	Target deals 25% less damage.
Brand	Holy mark: target takes +15% damage.
Armor Break	Target’s armour counts for 25% less.
Stun / Stagger	Interrupts and briefly stops the target.
Blind, Root, Slow, Sleep	Miss chance, cannot move, slowed, or asleep until hit.

Kill streaks

Kills within 4.5 seconds of each other build a streak. The streak adds up to **+100% XP** (+1% per kill, capped at 100 kills) and shouts milestones:

Kills	Shout
10	KILLING SPREE
25	RAMPAGE
50	UNSTOPPABLE

Kills	Shout
100	GODLIKE
200	ASHEN TEMPEST
350	CROWNBREAKER
500	LEGEND OF THE ASH

Tip Packs aggro together, so pulling one enemy pulls the group. That is the point — dive in, spin, and keep the streak alive.

Death

When you fall you wake at the last waystone you touched, lighter by a tenth of your gold.

3 Weapons & Loadout

You carry up to four weapons in slots 1–4. The weapon in your hand decides what Q, E and R do. Spellbooks (tomes) can be slotted too: with a tome in hand, left click throws bolts of its element and Q/E/R cast its spells.

Inventory: equipment paper doll, weapon slots 1–4 (the one in hand is marked), the 48-slot bag with rarity filters, and the item detail panel with comparisons.

Elemental weapons roll one of: **Fire** (“Blazing”), **Frost** (“Frozen”), **Lightning** (“Thundering”), **Void** (“Hollow”), **Holy** (“Radiant”), **Rot** (“Blighted”). Their hits can apply that element’s status.

Ability kits (Q / E / R)

Each weapon type has a three-ability kit. Elemental tomes in your other slots can upgrade some techniques into elemental versions (see Abilities → Elemental combos).

Skills window: weapon tabs 1–4, the Q/E/R slots for the weapon in hand, the technique pool, your class signature and passives.

6 Classes

12 classes. Each has a starting kit, starting skills, a unique resource and a signature move on X.

Race & class rarity

The fate dice are weighted. Every race and every class has a rarity; common ones turn up most of the time and Supreme ones almost never. Rarer fates are stronger: the race bonus and the class bonus stack.

15 Settings & Tips

Settings.

Setting	What it does
Music / Sound effects	Volume sliders.
Camera	**Cinematic** tilts the view with perspective, depth of field, bloom and sun shafts, leans buildings, trees and characters away from the centre of the screen for a 2.5D look, and adds camera roll/zoom punch on big hits. **Flat 2D** is a pixel-exact top-down view. Cinematic switches itself off on slow machines.
Depth of field	Softens the far and near edges of the screen in Cinematic mode.
Spell effects	**Enhanced** renders spells on the GPU with glow, flames, crystals and lightning. **Classic** uses simpler pixel effects.
Pixel scale / glow	Rendering sharpness and the emissive glow pass.
Damage numbers	Show or hide floating damage.
Screen shake & kick	How hard the camera reacts to hits.
Controller vibration	Rumble on hits and big moments.

Tips

- Keep two or three different weapons in your slots and swap mid-fight: each swap brings a fresh set of off-cooldown abilities.
- A tome in a slot does double duty — swap to it for spells, or keep it next to a weapon for elemental combo upgrades.
- Chill three times to freeze; soak then shock for +40% lightning damage; brand a boss before your burst.
- Stay in the fight to keep your streak: the XP bonus reaches +100% at 100 kills.

- Sell or junk-mark (Shift + right click) the grey stuff; rare+ items beam, so you never miss the good drops.
- Attune every waystone you pass — fast travel is free and works from dungeons.
- Bosses get a slow-motion intro. Use it to line up your opener.
